PROFESSIONAL EXPERIENCE

Frontend Developer - Simpaisa

April 2026 - Present

- Developed and maintained production-level fintech products using Angular and TypeScript, delivering secure and reliable financial solutions.
- Designed and implemented a reusable component architecture, improving code maintainability and reducing development effort for new features.
- Integrated RESTful APIs for financial operations, ensuring reliable data exchange and a consistent user experience.
- Improved UI performance and responsiveness, delivering a seamless experience across desktop and mobile devices.
- Collaborated with backend developers and QA engineers on API integration, bug fixing, and feature enhancements to improve system stability.
- Optimized application performance through lazy loading, code splitting etc.
- Contributed to application testing, debugging, and continuous improvement efforts throughout the software development lifecycle.

Associate Software Engineer - KoderLabs

June 2025 - March 2025

- Developed scalable, high-performance mobile applications using React Native and web applications using React.js.
- Integrated RESTful APIs to deliver dynamic, real-time features across mobile and web platforms.
- Implemented location-based features using Google Maps APIs.
- Implemented internationalization (i18n) to provide multi-language support, improving accessibility and user satisfaction.

- Built responsive, SEO-friendly UIs with Next.js, TypeScript, and Tailwind CSS.
- Ensured cross-platform compatibility and performance optimization for Android, iOS, and web.
- Wrote reusable components and managed application state using Zustand.
- Collaborated with backend teams on API design, integration, and optimization.
- Actively participated in bug fixing, R&D, and code reviews while following industry best practices.
- Conducted and contributed to code reviews with senior developers to improve code quality, maintainability, and application architecture.

SKILLS

Frontend Technologies:

Next.js, React.js, React Native, Ant Design, Shadcn, TypeScript, Angular, JavaScript, Redux, Context API, Tailwind CSS, HTML5, CSS3

Tools & Platforms:

Visual Studio Code, Figma, Slack, Postman

API & Payment Integration:

Stripe Api & Google maps Api

Authentication:

Clerk, Firebase, NextAuth

Other:

Version Control (Git), Agile Methodologies, Best Coding Practices, Scalable Folder Structure & Reusable Components

PROJECTS

Tech Path AI

<https://tech-path-ai.vercel.app/>

Tech Path AI is an AI-powered career guidance platform designed to help students make informed decisions about their future in Software Engineering and Computer Science. The system evaluates users through assessments and analyzes their skills, interests, and strengths to provide personalized career recommendations. It also offers learning roadmaps and guidance to bridge skill gaps and support long-term career growth. The platform also aims to provide insights about various tech fields through roadmaps & career descriptions.

SAL Mine Project

<https://savealifemine.com/>

Sal Mine is a project developed for a USA-based client, aimed at providing first aid solutions during emergencies. The system helps by sharing essential information, such as allergies, existing medical conditions, and current medications of the patient with available doctors, enabling them to provide timely and informed medical assistance.

EDUCATION

Bachelor of Science in Software Engineering

Jan 2022 - Nov 2025

Department of Computer Science (UBIT)

- CGPA 3.5 out of 4.0
